

PULSE ROLLER

## PULSEROLLER - GLOBAL MOTOR ROLLER TECHNOLOGIES

*PulseRoller has successfully entered the European market with the most innovative selection of low voltage 24VDC Motor Rollers and Controls ever seen in the Materials Handling Industry.*

Over the past 8 years the PULSEROLLER brand has been gaining strength and a large market share globally such as the United States, Asia, South America, Africa, and many other locations around the world with hundreds of thousands of Drives and Control products installed.

We are excited to announce we have entered the European Union market with full Sales, Technical Support, and Manufacturing capabilities in multiple locations such as Germany, Bulgaria, and the UK.

**PulseRoller** consist of a team of top notch electrical and mechanical experts in the Materials Handling Industry. The PulseRoller team has an extensive history of developing low voltage electrical controls and powerful motor rollers designed with End Users and OEM's in mind. Through innovative research and development, continuous testing, and top level quality control procedures PulseRoller is now the simple choice for your Motor Driven Roller and Control solutions.

The **PulseRoller** brand consists of a variety of [SENERGY](#) Motor Driven Rollers of various diameters and configurations, [Geared Drive Motors](#), and [Specialty](#) Rollers. [Controls solutions](#) consist of the most advanced Ethernet networked drive controller in the world, a simple mid-level "plug and play" ZPA controller, various simple drive card controllers, and other optional components to assemble and implement motor driven roller conveyors and systems.

With our successful showing at CeMat in May 2014 we look forward to providing the world the best Motor Drive Rollers and Control Technologies available anywhere.
